

Our Product

SafeDial Wireless is a unique Multi-Path 4G & IP wireless module that sits inside your existing alarm panel. The **only** full featured unit that can deliver alarm events to ANY control room on a secure and fully redundant platform.

Globe's GL45-4G Wireless unit delivers alarm events by either:

- Dialling your 1300/1345 Security Number - thus landing on the dialler lines of your Control Room.
- Landing on a separate line of the Permaconn digital IP receiver as a Permaconn sister product.

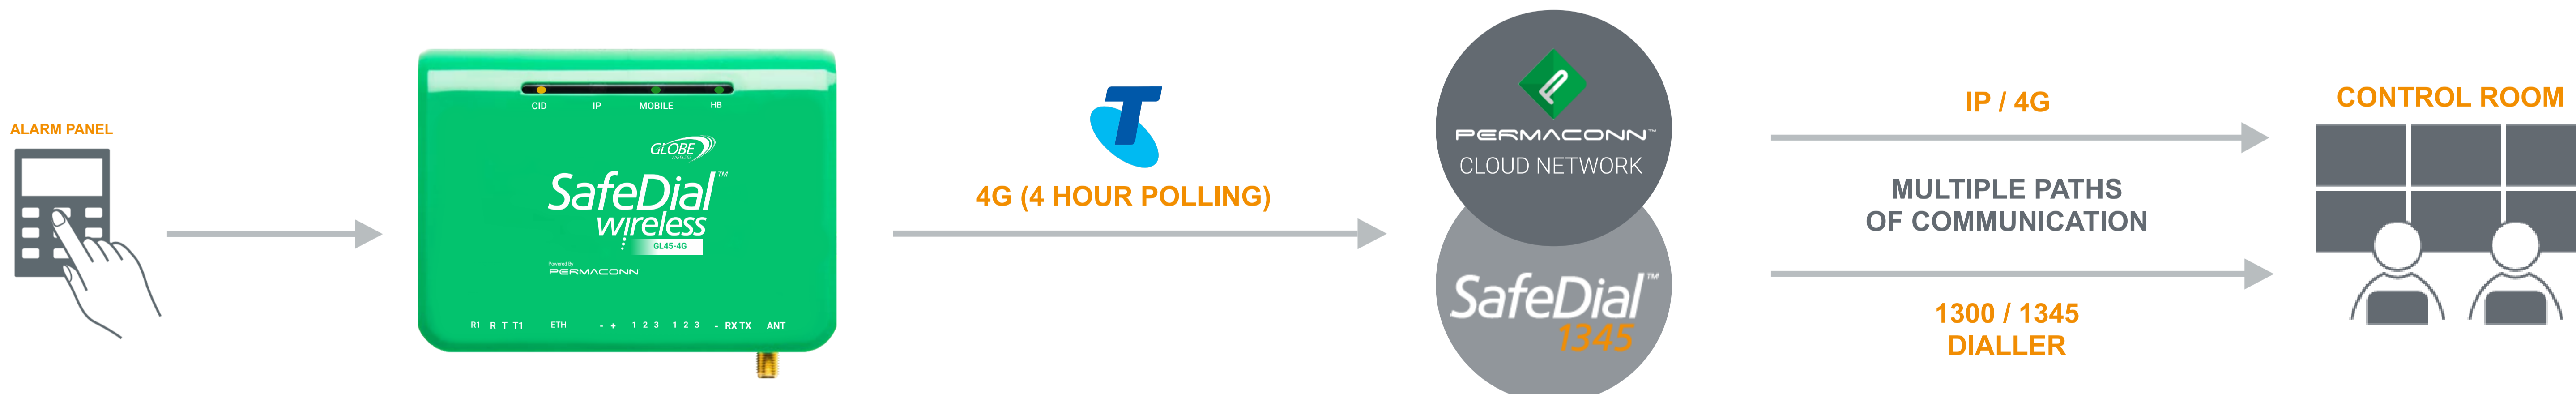

With a low purchase price and low operating cost, Globe places the ownership and control back into your hands.

Features

- ✓ Telstra 4G SIM
- ✓ 4 hour Integrity Polling on 4G & IP
- ✓ 'Plug & Play' solution
- ✓ Compatible with ALL Control Rooms
- ✓ Interfaces with any Contact ID Alarm Panel
- ✓ Low ongoing operational costs
- ✓ Fully redundant network from customer premise to Control Room
- ✓ Remote Arm / Disarm with **PocketSecure™**
- ✓ Installation & Commissioning Tools with **SafeDial Toolbox™ (ATLAS)**
- ✓ Remote Alarm Panel Upload / Download with **SafeDial Config™ (PCS)**
- ✓ Power / Control in Bureau's hands, not locked into a Control Room - Full portability of devices.

SafeDial Wireless™ - Intelligent Network

SafeDial Wireless™ - Supporting Applications

Arm and Disarm from your smart phone

View call and data reports for all your SafeDial services

Desktop Application for remote upload/download to your alarm panels (PCS)

Diagnostics and activation of SafeDial Wireless™ (ATLAS)

SafeDial Wireless™ - Supporting Applications

SafeDial™ toolbox

'Your Remote Technician'

A web app providing activation, installation and diagnostics for installers. No guesswork - leave the site knowing the installation is complete and fully operational.

- Activate your units on-site
- View the status and health of the unit
- See the event history and Contact ID messages.

SafeDial™ config 01010

'Your Remote Access'

A software application that allows the user to remotely connect their Alarm Panels, upload / download configuration software via Globe's SafeDial Wireless network.

The solution effectively replaces the traditional phone line dialler solution and eliminates the need to visit customer premises for Alarm Panel configuration changes.

mySafeDial™

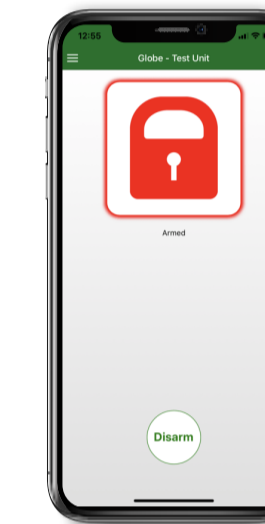

'Your Personal Manager'

A secure and powerful web portal, providing access to your SafeDial call details and customised reporting. View call details for all SafeDial services.

- Last 6 months call details at a glance displayed in graphical format.
- See 'your' services and configuration details, including control room and landing points
- Run customised call reports for a whole month.
- SMS and email alerts are sent for alarm panels making excessive calls.

Pocket Secure™

'Your Remote Guard'

A downloadable app for smart phones, providing remote Arm / Disarm functionality for your end users.

Ever left the office and forgot to arm the alarm? Not a problem, simply open Pocket Secure™ on your smart phone and secure your premises!

One app can be used for arming and disarming multiple locations - Home, Office or Holiday Home.
